

**Global Stocktake: Loss of Mountain Water Resources and  
Sea-level Rise: Why 2°C is Too High for 3.5 Billion**

Thursday June 8, 11:45-13:00 CEST

Room Kaminzimmer and Livestreamed/Cached at [unfccc.int/SB58/schedule](https://unfccc.int/SB58/schedule)

- 11:45 Opening Remarks – Ambition on Melting Ice Co-chairs**  
Helga Bardadottir, Iceland and Eduardo Silva, Chile
- 11:55 Irreversible Impacts: Taking Stock of Why 2°C is Too High  
Global Cryosphere Findings From, and Since IPCC AR 6**  
Pam Pearson, Executive Director, ICCI
- 12:05 Global Stocktake and Implications for Mountains Above 1.5°C**  
Izabella Koziell, Deputy Director, ICIMOD
- 12:20 Implications for Mitigation Work Programme**  
Annika Christell, Sweden
- 12:25 Implications for Nairobi Work Programme**  
Dr. Joanna Post, UNFCCC Secretariat
- 12:30 Implications for Loss and Damage from Irreversible Sea-level Rise**  
Dr. Carlos Fuller, Belize
- 12:35 A New Zero Development Pathway: Model of Bhutan**  
Tashi Pem, Bhutan
- 12:45 Panel Discussion/Q&A**
- 13:00 Close and Light Lunch Reception**

Organized by International Centre for Integrated Mountain Development (ICIMOD), International Cryosphere Climate Initiative (ICCI), Scientific Committee on Antarctic Research (SCAR)
